# Introducing new Intergrain® Enviropro® Hard Wax Oil.

Enviropro® Hard Wax Oil is a blend of waxes and oils that provides interior timber with a natural look. This hard wearing timber floor finish maintains the texture of the timber – leaving a beautiful, tactile floor.

Hard Wax Oil is quick and easy to apply, and can be easily maintained or repaired without having to sand the surface.

## Home owners will love:

|                                     |                                                                |
|-------------------------------------|----------------------------------------------------------------|
| Natural matt finish                 | Non-toxic when cured                                           |
| Maintains the wood texture and feel | No sand maintenance – just clean and coat                      |
| Highly durable, hard wearing finish | EN71 certified – suitable for application onto children's toys |
